DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a method for preparing glycolaldehyde.

Group II, claim(s) 8, 9, and 11, drawn to a catalyst composition.

Group III, claim(s) 12-18, drawn to a method for preparing ethylene glycol.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and II and II and III are drawn to a catalyst composition and method of using said composition. They lack a "special" technical feature because the process of Group I and the process of Group III can be practiced using another materially different catalyst, and the catalyst composition of Group II can be used in other types of reactions, including other carbonylation reactions.

The inventions of Group I and Group III are drawn to patentably distinct processes for making distinct classes of compounds.

During a telephone conversation with applicants' representative, Craig Lindell on February 11, 2008 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-7. Affirmation of this election must be made by applicant in replying to this Office action. Claims 8, 9, and 11-18 are withdrawn from further consideration by the examiner, as being drawn to a non-elected invention. 37 CFR 1.142(b).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the claims are drawn to a process for preparing glycoaldehyde by hydroformylation in the presence of a catalyst composition. The closest prior art of record, i.e., references listed on the attached PTO-1449 fail to teach or suggest the hydroformylation of formaldehyde in the presence of a catalyst system as recited in the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicants' representative, Craig Lundell on February 11 and February 15, 2008.

The application has been amended as follows:

On page 4 of the specification, in each occurrence, "Figure I" has been changed to *Formula Ia*.

In the claims: Claims 8, 9, and 11-18 are cancelled.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sikarl A. Witherspoon whose telephone number is 571-272-0649. The examiner can normally be reached on M-F 8:30-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler can be reached on 571-272-0871. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
